

Smart Frame is modern system of stretching of fabrics into aluminium frame. This system is unique composition of high quality printed on fabrics.

Fabrics edged with special silicone rubber provides fast and easy montage.

Some profiles are dedicated to manufacturing untypical spatial forms such as rims, circles, boxes readily used in fair and exposition sector.

These products may also be backlighted and presented in suspended, wall-mounted or free standing form.

Box

profile: FBox

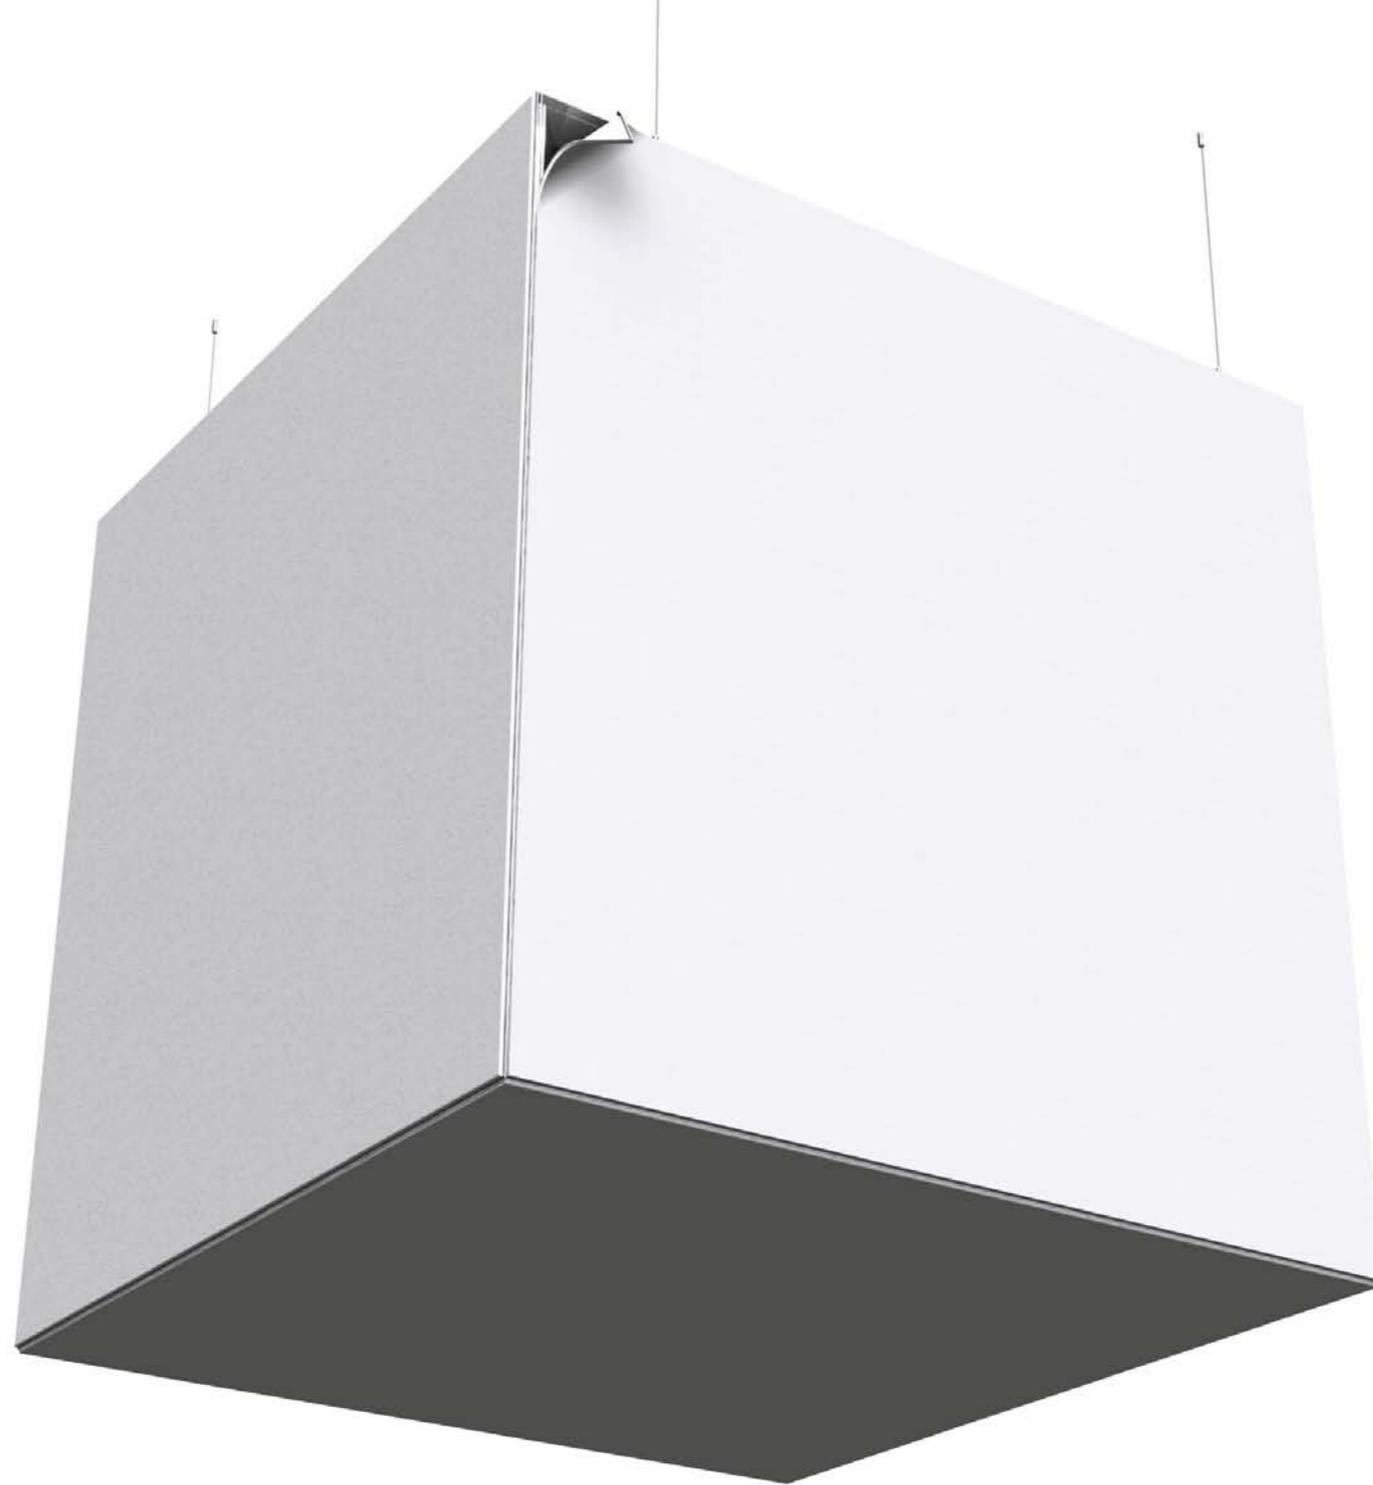

standard colour: silver

optional colour: any RAL colour

graphics: four-sided , five-sided, six-sided

intended use: free standing, suspended
