LIGHT, BRIGHTNESS, COLOUR DEPTH

**Smart Frame** is an exclusive and modern stretch textiles system designed for interior decoration.

This innovative way of presenting graphics consists of aluminium frame and stretch textile face. Intuitive and problem free replacement of textile allows swift adaptation of new graphics to currently presented collection. With **Smart Frame** system it is possible to use multiple types of textile materials, both smooth and those of cloth design or with pearly glow. Textiles are printed by means of modern sublimation or latex technology which provides unprecedented colour depth, delicate semi-shades and tonal transitions.

Backlight improves functionality and adds brightness of the entire

exposition. Using high performance LED modules provides intensive backlight even in very bright rooms.

**Smart Frame** gives possibilities of application, it is designed for both wall mounted, free standing and suspended expositions.

Examples of applications:

- Large format wall graphics
- Pictures of collections, paintings
- Shop windows
- Dressing rooms
- Partition walls
- Lining of shop counters

**FOR  
SMART  
FRAME  
SHOPS**

In practice **Smart Frame** is not limited by dimension.

Variety of profiles, individuality of graphics and possibilities of matching dimensions and shapes stimulate the imagination of designers in creating unique spaces.

Frames may be slimline, practically invisible, as well as wide thus becoming the aesthetic and original element of decoration.

DURABLE, FUNCTIONAL AND PRACTICAL

Prints designed for graphical signage of space, improve aesthetics of individual departments, creating at the same time consistent system of visual information. Main assets of the system include lightweight and durable structure and wide range of textiles with flammability certificate. Media can be mounted to walls, suspended from ceiling and exposed as free standing version. Possibilities of combining modules and their arrangement in optional configuration allow the management of large surface areas.

Textiles in **Smart Frame** system can be combined with additional elements of store signage, such as: description of assortment, brand names and any additional information.

Examples of applications:

- Large format wall graphics
- Separation of store space
- Signage of sales divisions
- Signage of promotional zones
- Signage of shelf ends
- Installation of pallet islands

Smart Frame creates a purchase conducive atmosphere, improves comfort and positively impacts the emotions.

**Smart Frame** is an ideal solution for every space, since it utilizes big and small formats, straight, super thin and decorative, varnished or aged profiles. All this is matching individual store space. High quality digital print of rich colour range allows swiftly matching the graphics to the current exposition.

LED diodes will illuminate the room giving each room individual character. Sublimation is a print technology that allows the pigment transfer into textile structure resulting in abrasion and moisture resistance. This technology also allows washing the prints. Latex print however, gives wide possibilities of application of decorative textiles of different design.
